Objective

Ambitious Software Engineering graduate (GPA 4.54/5.00) with strong expertise in financial operations, data analysis, and full-stack development. Skilled at turning complex datasets into actionable insights and streamlining processes for maximum efficiency. Ready to apply analytical rigor and technical acumen in a Graduate Development Program to drive immediate, measurable impact.

Education

Bachelor of Science in Software Engineering

University of Jeddah, Saudi Arabia | GPA 4.54 / 5.00 | Graduated March 2023

Professional Experience

Financial Operations & Data Analyst

Khyroocom Charity Association | Jeddah | Jun 2021 – May 2025

- Managed end-to-end donation processing in Enterprise Resource Planning (ERP) with 100% accuracy.
- Cleansed and analyzed ERP data to inform resource allocation and strategy.
- Automated Power BI dashboards to track KPIs—accelerating insights by 40%.
- Segmented donors and ran targeted campaigns, lifting repeat gifts by 22% and overall donations by 18%.
- Crafted engaging presentations for stakeholders, boosting transparency and support.

Application Developer Intern

Derwaza IT | Jeddah | May 2023 – Jul 2023

- Translated stakeholder needs for an on-demand curbside-delivery app into Agile user stories, ensuring clear development scope.
- Architected and implemented a scalable Flutter/Dart MVP using MVP design patterns, integrating front-end with RESTful APIs.
- Delivered a fully functional prototype within three weeks, accelerating time-to-market and securing stakeholder sign-off.

Software Developer Intern

Easy Doc | Jeddah | Apr 2022 – Dec 2022

- Built modular Angular UI components for efficient, maintainable code.
- Created reusable TypeScript libraries to minimize duplication.
- Developed Flutter mobile features for rapid cross-platform prototyping.
- Collaborated on RESTful API development for seamless front-to-back integration.

Key Projects

“UJ Bridge” Mobile Learning App | Dec 2022 – Feb 2023

- Led requirements gathering through 10+ stakeholder interviews; defined MVP scope and success metrics.
- Managed a cross-functional team of four in a Waterfall-modeled sprint; delivered a Flutter/Firebase solution that earned an “A+” faculty grade.
- Presented data-driven impact analysis and UX testing findings to university faculty and industry guests.

Technical Skills

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, Angular, Flutter/Dart, Python, Node.js, SQL
- Data & BI:** PostgreSQL, Excel (advanced), Power BI, data visualization, KPI development, ETL
- Methodologies:** Agile/Scrum, Waterfall, TDD, RESTful API design, user-story mapping
- Tools & Platforms:** Git/GitHub, Jira, Firebase, Postman, Microsoft Office Suite
- Soft Skills:** Cross-functional leadership, strategic analysis, bilingual communication (Arabic/English)

Certifications

- Junior Data Scientist** – INE (136-hour program) | June 2025
- Agile Software Development** – University of Minnesota | Dec 2023
- Business Intelligence** – Saudi Digital Academy | Mar 2024
